GST PRACTICAL TRAINING — DAY 28

Sales Register • GSTR-1 Working • GSTR-3B Working • Purchase Register

Training objective

Prepare and cross-check a sales register, classify invoices for a GSTR-1 working summary, prepare a simplified GSTR-3B working, and total the purchase register.

1. Sales Register — invoice details

Invoice	Customer	Type	State	Taxable (₹)	Rate	CGST (₹)	SGST (₹)	IGST (₹)	Invoice Total (₹)
INV001	ABC Traders	B2B	UP	1,00,000	18%	9,000	9,000	0	1,18,000
INV002	XYZ Store	B2C	UP	50,000	18%	4,500	4,500	0	59,000
INV003	PQR Enterprises	B2B	Delhi	80,000	18%	0	0	14,400	94,400
INV004	Kumar Retail	B2C	UP	30,000	5%	750	750	0	31,500
INV005	LMN Traders	B2B	Bihar	60,000	12%	0	0	7,200	67,200

Verified totals

Particular	Amount (₹)
Taxable value	3,20,000
CGST	14,250
SGST	14,250
IGST	21,600
Total GST	50,100
Invoice total	3,70,100

2. GSTR-1 working classification

B2B invoices: INV001, INV003 and INV005. B2C invoices: INV002 and INV004. Credit/debit notes, exports and HSN-wise details were not supplied, so those sections cannot be completed from this dataset.

3. GSTR-3B working summary

Particular	IGST (₹)	CGST (₹)	SGST (₹)
Output tax	21,600	14,250	14,250
Practice ITC	5,400	8,100	8,100
Indicative net amount	16,200	6,150	6,150

4. Purchase Register — verified totals

Particular	Amount (₹)
Taxable purchases	1,20,000
IGST	5,400
CGST	8,100
SGST	8,100
Total purchase GST	21,600

Key learning and review notes

• Separate intra-state and inter-state tax treatment in the practice data.
• Classify B2B and B2C invoices separately.
• Reconcile invoice-wise values to register totals.
• Use SUM and row-level formulas instead of manually typing calculated totals.

Compliance note

This is a fictional training exercise. State-based tax treatment is assumed for practice; actual GST depends on supplier location, place of supply, transaction facts and applicable law. ITC is not automatically claimable merely because GST appears on a purchase invoice. Verify statutory eligibility, GSTR-2B, invoice, receipt, business use, blocked-credit provisions and reversals. This working is not a filed return.
