Attendance Evidence

Attendance photo submitted during the Day 06 session.

Final QA – Corrected Data

Area	Result
Raw Employee Data	10 employee records; raw mixed-case data retained for cleaning practice
Clean Employee Data	Names, departments, designations and status cleaned
HR / HR Executive formatting	HR = 6; HR Executive = 5
Data Validation	10 total; 9 Active; 1 Inactive; all 10 Employee IDs Unique

HR MIS Summary	All department/designation and salary totals match

HR MIS Final Figures

Metric	Result
Total Employees	10
Active / Inactive	9 / 1
HR / Finance / Sales	6 / 2 / 2
HR Executive / Accountant / Sales Executive / Recruiter	5 / 2 / 2 / 1
Total Salary	296,000
Average Salary	29,600
Highest / Lowest Salary	35,000 / 25,000

Performance Summary

Day 06 demonstrates practical HR data-entry and MIS skills: maintaining raw employee records, cleaning inconsistent text, checking duplicate IDs, validating employee counts, and producing department, designation and salary summaries. The main learning point was handling abbreviations such as HR where PROPER() alone produces “Hr”; the corrected clean-data result uses “HR”.

Final record note: This Day 06 report is finalized from the corrected data tables supplied in the chat after the user's corrections. The original workbook upload could not be re-uploaded today because the upload limit was reached; therefore this report does not claim a fresh file-level upload verification.
