HR PRACTICAL TRAINING — DAY 12

EPF & ESIC + Excel Billing and Invoice Practice

Training type: Self-directed practical HR/Excel training work-log

Date: 09 October 2026

Status: Completed — workbook reviewed

Timing: Exact start and final submission times were not independently verified.

1. Objectives

Practice basic EPF and ESIC record tracking, link employee statutory data across worksheets, build a summary using Excel formulas, and learn the structure of a simple company invoice and billing tracker.

2. Workbook sheets reviewed

Sheet	Review result
EPF Master	10 employees; employee and employer contribution formulas use 12% of basic salary for this simplified exercise.
ESIC Master	Employee details linked from EPF Master; ESIC marked Not Applicable/No for this training example.
Employee Statutory	Employee details linked across sheets; total employee deduction adds Employee EPF and Employee ESIC.
EPF ESIC Summary	Summary formulas are set up for employee count, contributions and deductions.
HR Billing	Taxable amount, GST amount, invoice total and billing totals use formulas.
Invoice	Basic invoice layout includes company/client details, invoice dates, item quantity/rate, subtotal, GST and grand to

3. Expected results for the simplified training dataset

Metric	Expected result
Total employees	10
EPF applicable employees	10 (assumed for this exercise)
Employee EPF contribution	■35,520
Employer EPF contribution	■35,520
Total EPF contribution	■71,040
ESIC applicable employees	0 (assumed for this exercise)
Total employee statutory deduction	■35,520

4. QA notes

• The key EPF, ESIC, statutory deduction and billing calculation formulas are present in the workbook.
• In EPF ESIC Summary, change the label “Matric” to “Metric” if it remains in the latest file.
• In the HR Billing sample, INV001 quantity is entered as 22. Confirm whether 22 is intentional; if you meant 2, change E2 to 2. This is a value check, not a formatting penalty.
• The billing summary currently includes invoice count, taxable amount, GST and invoice value. Paid and Pending invoice counts can be added later if desired.
• The Invoice sheet is treated as a learning/sample layout, not a real tax invoice. GSTINs are placeholders and should not be used for actual invoicing.

5. Compliance and completion note

The EPF and ESIC percentages/applicability in this workbook are simplified training assumptions. Actual payroll processing must follow current applicable statutory rules and establishment-specific eligibility. This report records practical learning and is not an employer-issued employment or experience certificate.
