HR Practical Training — Day 16

Workforce Planning, Manpower Requisition & Recruitment Pipeline

Training Date	13 October 2026
Workbook Reviewed	HR Training Day 16(1).xlsx
Start / completion time	Exact start and completion times not verified
Review status	Workbook reviewed; core formulas and charts present

Training Objective

Practise headcount planning, vacancy-gap calculation, manpower requisition tracking, recruitment-pipeline metrics, and summary-chart interpretation using fictional training data.

Workbook Sheets Reviewed

Sheet	Purpose / review result
Manpower Plan	8 departments; current, required and approved headcount; vacancy-gap and hiring-status formulas.
Manpower Requisition	10 sample requisitions; approval status distribution is 4 Approved, 5 Pending, 1 Rejected.
Recruitment Pipeline	10 requisitions with applied, shortlisted, interviewed, selected, joined and conversion-rate columns.
Recruitment Summary	KPI formulas and 2 charts are present; chart data ranges point to the intended source columns.

KPI Results

Metric	Verified result
Total departments	8
Current headcount	28
Required headcount	43
Total vacancy gap	15
Total requisitions	10
Approved / Pending / Rejected	4 / 5 / 1
Candidates applied	258
Shortlisted	99
Selected	25
Joined	12
Overall selection rate	9.69% (25 ÷ 258)
Overall joining rate	48.00% (12 ÷ 25)

Chart Review & Final Notes

Two charts are present in Recruitment Summary. The first uses Department vs Vacancy Gap from Manpower Plan. The second uses Job Title vs Joined from Recruitment Pipeline. The chart source ranges are

appropriate. For a clearer presentation, rename the current chart titles from the generic/misspelled labels to **Department-wise Vacancy Gap** and **Recruitment Joining Overview**.

The Total Selected KPI is correctly calculated as 25, and the Overall Selection Rate formula currently evaluates to 9.69%. If a separate chart comparing Candidates Applied, Shortlisted, Selected and Joined is desired, make a small two-column summary table for those four metrics and insert a Clustered Column chart. The two existing charts do not directly plot the Total Selected KPI as a single bar.

Training disclaimer: This is a self-directed practical training/project report using fictional sample data. It is not an employer-issued certificate or proof of employment.
