HR Practical Training — Day 17

Employee Attrition & Retention Analysis in Excel

Training Date	14 October 2026
Workbook Reviewed	HR Training Day 17(1).xlsx
Start / completion time	Exact start and completion times not verified
Training data	Fictional sample employee records

Training Objective

Practise employee attrition calculations, department-wise analysis, exit interview tracking, retention action planning, Excel dropdown validation, conditional formatting and dashboard charts.

Workbook Review

Sheet	Review result
Employee Attrition Data	10 employee records; Active/Exited dropdown is present for the Employee Status column.
Attrition Analysis	Department-wise COUNTIF/COUNTIFS and attrition-rate formulas are present; total row calculates 10 emp
Exit Interview Tracker	3 exit interview records; Completed/Pending dropdown is present; 2 completed and 1 pending.
Retention Action Plan	5 retention actions; Completed/Pending/In Progress dropdown is present; 3 completed, 2 pending and 0 in
Retention Dashboard	8 KPI rows link to the source sheets or count the source table; both charts are present with correct data ran

Verified KPI Results

KPI	Result
Total Employees	10
Active Employees	7
Exited Employees	3
Overall Attrition Rate	30.00%
Completed Exit Interviews	2
Pending Exit Interviews	1
Completed Retention Actions	3
Pending Retention Actions	2
Exit Reasons	Career Growth: 1; Salary: 1; Relocation: 1

Final QA Notes

The core calculations, dropdown validations and dashboard chart source ranges are correct. One small presentation improvement remains: the first chart title currently displays as “Department-wise”; rename it to “Department-wise Attrition Rate”. The second chart uses the three exit reasons and their counts correctly.
