HR PRACTICAL TRAINING — DAY 19

HRMS Introduction and Employee Profile

Training Day	Day 19
Project Area	Zoho People — HRMS / Employee Profile
Record Type	Self-directed practical training report
Evidence	This report records the training scope discussed in the session; it does not claim an employer-issued record or certification.

Training Objective

Understand how an HR Management System (HRMS) stores employee information and supports day-to-day HR administration.

Practical Work / Learning Record

• Explored Zoho People as the HRMS platform for this training.

• Reviewed the employee-profile concept and the types of information HR normally maintains, such as employee identity, department, designation, joining details and employment status.

• Connected employee master information with later HR activities such as attendance, leave, onboarding and reporting.

• Focused on using sample training records and checking profile fields carefully before saving changes.

Skills Practised

• Navigating an HRMS interface and locating employee-related areas.

• Understanding employee profile fields and the importance of consistent, accurate HR records.

• Recognising that access to specific modules can depend on account configuration and permissions.

Outcome

Day 19 established the HRMS and employee-profile foundation for the following practical sessions on attendance, onboarding and recruitment.

Record note: The report summarises the Day 19 learning scope available in the training record. Any unverified account actions are not represented as independently confirmed.
