HR PRACTICAL TRAINING — DAY 20

Attendance Review and Onboarding Candidate Record

Training Day	Day 20
Project Area	Zoho People — Attendance and Onboarding
Attendance Period Seen	18–24 October 2026
Evidence	Two user-provided screenshots: Attendance Summary and Onboarding Candidate

Training Objective

Review attendance information in Zoho People and understand the relationship between attendance administration and onboarding records.

Practical Work Completed / Evidence Provided

• Reviewed an Attendance Summary screen for the period 18–24 October 2026. The supplied screen showed check-in/check-out information and working-hours values.

• Explored attendance settings and noted the configured Full Day threshold of 8 hours and Half Day threshold of 4 hours.

• Reviewed attendance method settings including Regularisation, On Duty, Hourly Permission, Break, Kiosk, Office and Remote In, and Location Tracking; these were shown as OFF in the settings observed.

• Observed that no overtime policy had been created in the settings reviewed, and that Reports were OFF in Attendance settings.

• Reviewed an Onboarding Candidate screen showing Rahul Singh with Department IT and Onboarding Status ‘Triggered’ (one record visible).

Skills Practised

• Reading attendance summaries and checking attendance policy thresholds.

• Distinguishing attendance configuration from actual attendance-entry actions.

• Recognising onboarding status and reviewing a candidate onboarding record.

Outcome

Attendance settings and summary information were reviewed, and an onboarding candidate record was examined. The provided evidence supports these observations; it does not by itself confirm that every employee’s historical attendance was entered or that onboarding was completed.

Record note: Details are limited to the screens and settings described from the supplied screenshots and session notes.
