Sales Executive Training — Day 25

Project: Order Management, Payment Tracking & Sales Collection

Workbook reviewed: HR Training Day 25(Sales).xlsx

Objective: record customer orders, calculate pending payments, track collection status, and prepare a sales collection summary.

Status calculation uses 27-Oct-2026 as the review date. In Excel, the TODAY() formula will update the alerts automatically when the workbook recalculates.

Order Management Review

Order ID	Customer	Product	Order Value	Advance	Pending	Payment Status	Expected Date	Collection Statu
ORD001	Amit Traders	Laptop	85,000	50,000	35,000	Partial	29-Oct-2026	Upcoming
ORD002	Neha Enterprises	Printer	32,000	32,000	0	Paid	21-Oct-2026	Payment Completed
ORD003	Rahul Infotech	Desktop	65,000	20,000	45,000	Partial	28-Oct-2026	Upcoming
ORD004	Priya Solutions	Software	48,000	0	48,000	Unpaid	27-Oct-2026	Due Today
ORD005	Mohit Computers	Keyboard	12,000	5,000	7,000	Partial	30-Oct-2026	Upcoming
ORD006	Sunrise Systems	Laptop	95,000	95,000	0	Paid	24-Oct-2026	Payment Completed
ORD007	Gupta Electronics	Printer	27,000	10,000	17,000	Partial	27-Oct-2026	Due Today
ORD008	Verma Technologies	Software	72,000	0	72,000	Unpaid	28-Oct-2026	Upcoming
ORD009	Singh Enterprises	Desktop	58,000	30,000	28,000	Partial	29-Oct-2026	Upcoming
ORD010	Bright Solutions	Laptop	110,000	60,000	50,000	Partial	31-Oct-2026	Upcoming

Collection Summary

Metric	Calculated Result
Total Orders	10
Total Order Value	604,000
Total Advance Received	302,000
Total Pending Amount	302,000
Paid Orders	2
Partial Payment Orders	6
Unpaid Orders	2
Overdue Payments	0
Due Today	2
Upcoming Payments	6

Corrections & Practical Notes

• The Pending Payment formula =E2-F2 is correct for the supplied data.

• The Collection Status formula checks completed payment first, then compares the expected payment date with TODAY(). This is a sensible alert order.

• The Payment Status column is manually entered. Keep it consistent with the payment amounts: Paid when pending amount is zero, Partial when some payment is received, and Unpaid when no payment is received.

• For a real workplace, update the actual payment received and payment date after confirming the transaction. Do not treat an expected date as proof that payment was made.

• Useful next improvement: add Actual Payment Date, Payment Reference/Transaction ID, and Follow-up Notes columns to make the collection record more auditable.

Training Outcome

The workbook practices order entry, advance and pending payment calculation, payment-status tracking, and a summary report—useful for Sales Executive roles that include order coordination and payment follow-up.
